IST 263 Project Milestone 3 – Site Media

Name: Jake Howard

Description:

For my website project, I would like to make an e-commerce store. It would be financially unrealistic for me to hold onto the products I would be selling, I would use a drop shipping business model. Specifically, I would make a website with essential products for college students. One page will contain the products, another page will have a mission statement, shipping details, and the last page will have FAQ's and reviews. I I think it is a fascinating opportunity to turn a project into a real stream of revenue. I find my idea really interesting because I have always loved the idea of being an entrepreneur. I believe with the skills and guidance I will have in IST 263, I can make this dream a reality and create a professional looking design.
